Genius TalentAI

Better Hiring for Recruiters, Better Experience for Candidates

20+ Years of Talent Acquisition

Genius TalentAI is a trusted Global Software Development Talent Solution Partner with nearly two decades of experience **connecting companies with top-tier tech talent.**

Our business is born out of a critical need to help businesses scale with exceptional engineers, we've honed our craft to become a leader in building high-impact, cohesive teams and talent solutions.

Today, we empower **startups, scale-ups, and enterprises** to thrive by matching exceptional talent with in-house teams using our AI-enabled talent acquisition platform **Genius TalentAI**.

Genius TalentAI Solves Today's Challenges...

80%	70%	42 days
of recruiter time spent on screening	of candidates never hear back	average time-to-fill

Recruiting teams are drowning in resumes while candidates feel ignored.

Manual screening doesn't scale.

We Help Our Clients Leverage AI to Overcome Legacy Recruiting and Talent Acquisition Challenges

The Hiring Crisis

80% of recruiter time is spent screening resumes and 70% of candidates never hear back. It takes too long to fill positions, is expensive, and doesn't scale at high volume.

Too Many Manual Processes

Our AI Agents work for you to intelligently screen candidates so that your team can spend their time building relationships, negotiating, and providing better talent. Manual screening impossible at scale.

High Recruitment Costs and Effort

Recruiting, onboarding, and managing talent involves significant administrative overheads, often diverting focus from core business objectives.

Avoid Candidate Black Hole

70% of resume submissions by candidates do not result in any feedback which is a negative image for the company. Candidates can chat with jobs in real time to get relevant feedback.

Time Drain on Low-Value Work

Reactive recruitment models often lead to mismatches in culture, skills, and commitment, resulting in higher turnover and underperformance. Recruiters become resume processors.

Personalized Agents for Everyone

Professional agents are looking out for both the company and the candidate to provide valuable services, direct engagement, and time savings.

Genius TalentAi: Solution Summary

Genius TalentAi: An Agentic AI product that saves recruiters and HR teams 50% of their screening time through four breakthrough innovations:

1. 3-Minute Auto-Configuration for AI-based candidate screening
2. Automated Conversational Screening that handles unlimited candidates 24/7 across technical, culture, experience and other factors
3. Cross-Customer Talent Network providing instant qualified candidate pipelines
4. Career Agents that work 24/7 to help candidates to search and apply for opportunities (Future)

Markets: We serve high-value markets including staffing firms, high-volume enterprise hiring (healthcare, retail, seasonal), and corporate talent acquisition.

The Opportunity: 70% of candidates never hear back. Recruiters spend 32 hours/week on low-value screening. High-volume employers (hospitals, retail chains) can't process 1000+ applicants without massive staff increases. Genius TalentAi gives recruiters their time back while transforming candidate experience - enabling them to focus on relationship building and strategic hiring instead of resume processing.

genius match

Unleash the Genius: How Genius TalentAi Works

Easy Setup

Automatically setup your position for AI screening by using our AI agents to parse Job Description, culture, and website to create the right screening questions to find the best talent. Manual configuration also available when needed for a tailored fit.

Interactive Screening

Using our Genius Recruitment Model, we allow candidates to interact directly with the job in real time so that they can get immediate feedback and avoid the resume black hole. Genius TalentAi will provide them with alternative positions if available and learning opportunities for career planning.

Quantified Talent Matching

We score each candidate and rank them for fit based on key hiring factors including technical, problem solving, culture, and provide our recommendations for next steps. We also provide deep insights into skills, gaps, and how they compare to the market.

Candidate Relationships

Real-time candidate feedback helps candidates get an assessment of where they are in comparison to the market and provides coaching opportunities.

Talent Network

Our talent network allows for proactive matching of opportunities for roles that candidates are qualified for right now across our customers.

Agentic AI for Recruiters and Candidates

For Recruiters

- Our AI Agent will help you identify better candidates by learning about the job and its unique requirements
- AI Agents are setup and tailored for each Job Role and Agents can be reused or cloned for similar jobs
- The Agent automatically creates and provides an interactive Candidate Assessment based on job description and other provided materials (culture, benefits, etc)
- Scoring algorithms show you the best candidates for the role based on the interactive assessment with Genie, our AI TalentAI.

For Candidates

- Immediately interact with Genie, the AI TalentAI for that specific job, to see where you stand
- In 12-15 minutes Genie will provide a Job Fit Assessment with detailed scoring based on the position requirements
- Genie will recommend opportunities for coaching and areas of improvement vs a “resume black hole”

Genius TalentAi: Value Proposition

Staffing Companies:

Save your recruiters 50% of their screening time - so they can focus on relationship building and closing candidates instead of resume processing

- Focus on High Value Activities
  - Reclaim 22 hours/week
  - Result: spend 30 hours/week on high-value activities vs 8 hours/week
- Maximize Time for More Placements
  - Increase placements by up to 50% per recruiter
  - Same team size, increased activity, higher revenue
- Increased Talent Network
  - Pre-assessed candidates make up a large pool of placeable talent
  - Reduced time to fill open positions with qualified candidates

High-Volume Enterprise Hiring:

Screen 1000+ candidates per role in days, not weeks - while providing 100% candidate feedback to protect your employer brand during high-volume hiring

- Handle Massive Application Volume
  - Screen candidates 24/7 with no recruiter fatigue
  - Consistent evaluation
- Supports Seasonal or Surge Hiring
  - Large hiring needs during peak seasons
  - Meet deadlines with 3x faster screening
- Employer Brand Protection
  - 100% of candidates receive personalized feedback
  - Online reviews and feedback scores increase

Corporate HR and Talent Acquisition:

Enable hiring managers to self-service simple roles in 3 minutes while your TA team focuses on strategic hiring - reducing time-to-hire by 60% across all roles

- TA Team Scales Without Headcount
  - Hiring managers post simple roles while TA focuses on strategic roles
  - More hires with same team
- Reduced Time to Hire
  - 3.6x faster to first interview with automated screening 24/7
  - More qualified candidates in pipeline with critical roles filled faster
- Internal Mobility Engine
  - Alternative opportunities across all open roles reduces external hiring
  - Hard to find roles filled by internal talent with higher retention
